I. EXECUTIVE SUMMARY

Program Title: **Humanitarian Aviation Support Services - Iraq**
Grant No. HDA-G-00-03-00131-00

Countries/Regions: **Iraq and neighboring region, in particular Jordan**

Disaster/Hazard: **Complex Emergency**

Report Time Period: **1 October to 31 December 2003**

Objective: Provide aviation support of 160 block hours/month to humanitarian agencies requiring access to Iraq from Kuwait and/or Jordan as well as internal transportation within Iraq.

Since the inception of the program on May 1st, the demand for air service throughout Iraq has steadily risen. This past quarter Air Serv flew 57.4 hours over the budgeted average block hours of 160 per month. In total the program flew 217.4 block hours. Both aircraft continue to fly well over the program hours even with the larger capacity aircraft¹.

US GOVERNMENT RESOURCES (USD)

	Objective 1	Grant Total
Budget through 31 December 2003	\$5,309,876	\$5,309,876
Expended this Period	\$747,321	\$747,321
Cumulative expended to date	\$2,605,289	\$2,605,289
Balance	\$2,704,587	\$2,704,587

¹ Originally the program used two King Air 200 with 9 persons seat capacity. Beech 1900 Ds replaced the King Air's allowing for full standing room and capacity for up to 14 passengers per flight (depending and cargo).

II. PROGRAM PERFORMANCE

Air Serv's mandate is the provision of safe, reliable air transport service to the humanitarian community including donor agencies and non-governmental organizations.

This last quarter continues with increased insecurity concerns in Iraq. The November missile attack against a non-military fixed-wing aircraft (DHL Airbus A300 cargo carrier)² surprised everyone and has resulted in the cancellation of flights by other non-military passenger carriers. Air Serv is now the sole non-military carrier for the humanitarian relief effort. Here are some significant quarterly changes:

- In this quarter alone, passengers progressively increased almost 13% from 885 in October to 999 passengers in December, by-passing the usual year end reduction due to seasonal holidays and year end celebrations.
- Similar to experiences in other programs the demand for cargo decreased as passenger demand has increased. Cargo fell from an average of 41 metric tons to about 22 metric tons. The fall could also reflect a change in passenger intention, as less people are staying for long periods of time.
- The limited availability of passenger air service into Iraq resulted in high volume of flight requests from parties other than humanitarian organizations and designated agencies. In close consultation with OFDA, Air Serv has developed a passenger protocol clearly outlining eligible passengers and the passenger responsibility. The protocol, instituted November 1, has ensured that only those with the proper credentials fly on grant funded Air Serv aircraft.³
- Due to the high volume of flight requests Erwin Temmerman (Country Director) recommended we add another Beech 1900D to the Air Serv fleet. The flexibility of scheduling three aircraft will result in more adaptable, responsive and efficient flights. The aircraft (ZS-OYJ) arrived the end of December and will be fully operating in January.

Overall the program continues to expand its capabilities through more adaptable and increased number of aircraft. We have doubled the capacity of our original assessment of two King Airliners and yet we are still not meeting demand. Currently Don Cressman, Vice President of International Operations is investigating alternative larger capacity aircraft that would allow us to increase our passenger intake.

A. Performance against Objectives

Objective 1: Provide dedicated aviation support to humanitarian agencies requiring access to Iraq from Kuwait and/or Jordan as well as internal transportation within Iraq.

² BBC News, November 22, 2003

³ The Protocol reviewed and approved by Air Serv and OFDA. It has been in place since November and it has worked extremely well.

2 Beech 1900 D

Target/Hours/Month/Aircraft	80.0 Block Hours
*Actual/Hours/Month/Aircraft	108.7 Block Hours

Note: Attachment 1 shows hours by specific aircraft.

**B. Indicators for Passenger Numbers, Block Hours, Medivac Availability
Quarterly Indicators for the Quarter 4 (October 1 to December 31, 2003)**

Indicator	Target	Actual for Period	Comments
Block hours flown/month (2 Beechcraft 1900D aircraft, or similar)	160 block hours /month	217.4 block hours /month	This quarter we flew 135 % of projected hours.
Objective: Provide aviation support to humanitarian agencies requiring access to Iraq from Kuwait and/or Jordan as well as internal transportation within Iraq.	Effective, timely, safe and reliable access to at-risk populations for continued risk evaluations and provision of humanitarian assistance and rehabilitation.	Average 933 passengers and 21.77 metric tons of freight/month.	30% more passengers flown over last quarter. Cargo is down, 43% in response to the increased passengers. ⁴
Evacuation and Medivac availability	Every Day	Every Day	At least one aircraft was available on every day of the quarter. And 5 medical evacuations were carried out.
Flight days available	90 days	90 days	At least one aircraft was available on every day of the quarter.

*Additional breakout please see Attachment 1 (Aircraft and Monthly Breakout) and Attachment 2 (Daily Passenger Breakout)

C. Success Stories and Program Highlights

The impact of Air Serv's accessibility and availability to the targeted population, the Iraq people stretches from the north, Erbil, down to Baghdad and Basra. On November 11th, Air Serv evacuated Baby Byan (4 days old) from Baghdad to Amman. Due to the critical nature of the baby's condition (transposition of the great arteries) Air Serv made 'special arrangements' with the immigrations officials at Marka airport by pleading for entry visas in the case of Baby Byan and her parents. Jordanian officials were very cooperative and issued the appropriate visas.⁵ Baby Byan was able to travel onward and receive the

⁴ The ever changing security environment is changing the travel behavior of humanitarian workers. The trend seems to be more frequent travel with shorter stays.

⁵ ASI Iraq Program, Jordan Ops Manager Angie Van Wyk, November 22, 2003.

AIR SERV

necessary surgery. Air Serv used its good standing reputation and recognized status as a humanitarian operator to assist in the evacuation of the sickly infant.

*Baby Byan and her Mother at Baghdad International Airport.

In early December Air Serv received a special request to transport 4 Kurdish children from needing special medical care from Erbil. The evacuation was coordinated by Humedica who has been working with the Kurdish Ministry of Health. The evacuation was delayed due to extremely bad weather, but eventually the children and their parents were flown to Amman. The children continued the journey to the US where a hospital had donated its services. According to Humedica there are an additional 600 children in need of serious medical attention⁶.

Air Serv was able to appropriately and quickly respond to these medical evacuations in a timely and reliable manner, gaining the necessary clearances and permissions. These are two examples of Air Serv's ability and flexibility in working in complex emergencies.

III. PROBLEMS AND SOLUTIONS

Over the past quarter several issues have emerged, but the main concern remains insecurity.

⁶ Humedica has been operating in Iraq since the beginning of April.

The primary threats continue to be Former Regime Loyalist and Islamic Extremist. Air Serv is aware of the increase of attacks involving non-Iraq civilians working in Iraq and attacks on all types of aircraft.⁷ Air Serv has tried to decrease risk by limiting the amount of expatriate staff in Iraq. Currently we have one operations manager and one security officer living in Iraq. The security officer, a newly formed position, is dedicated to keeping abreast of all security issues, gathering information and limiting Air Serv's exposure to potentially dangerous situations.

In October for a brief day and a half we were unable to obtain fuel on the ground in Baghdad. Due to a change in the fueling system the Officer in Charge would not allow refilling of Air Serv aircraft. After identifying the problem and obtaining proper clearances operations were back at full swing. Currently all Air Serv operated aircraft in Iraq have proper fueling cards and permission issued from the Department of Energy of the United States Government.

IV. RESOURCE USE/EXPENDITURE

Air Serv continues to greatly expand services within the approved budget. The elimination of a base in the costly city of Kuwait, and upgrading the aircraft to larger 1900D's has significantly decreased the cost per passenger. Though the 1900Ds use significantly more fuel; they also fly quicker, require less maintenance and carry more passengers. The high number of passengers which has lead to more than anticipated amounts of program income (over \$1,000,000 to date) and the cost reductions have allowed us to expand our operations and extend the time at no additional cost to the USG.

⁷ CPA Operational Threat Update, 15 December 2003.
